Introduction

Glenigan's league tables offer a view of the top performing businesses in UK construction, based on our comprehensive database of project and company activity.

This data not only provides businesses with highly-relevant sales leads, but also enables the Glenigan Economics Team to deliver tailored construction insight, analysis and recommendations to companies just like yours.

Our industry insight has been built up over years of impartial data gathering and our economics team combine this with their commercial expertise to provide the in-depth strategic insight that you need to make key budgeting and planning decisions.

Glenigan data covers all construction sectors, including education, health, hotel and leisure, industrial, infrastructure, offices, private housing, retail, social housing, and utilities, and spans across all 12 regions of the UK.

Methodology

The Glenigan league tables exclude frameworks and master leads, developer/builders, commercial projects below £250k build-value and residential projects under 10 units.

If your strategic planning would benefit from our unique industry insight, contact us on 0800 060 8698 to discuss your requirements.

Authors

Written by
Allan Wilén
Glenigan Economics Director

30 years experience in providing insightful market analysis and forecasts on UK construction and the built environment that can inform companies' business development and market strategies.

Co-written by
Drilon Baca
Economist

Drilon provides analysis and insights for Glenigan's monthly industry reports. He collaborates with clients to deliver tailored data and expertise, helping to inform their strategic decisions.
